DESIGNED FOR THE SMART ENTERPRISE

In today's fast-paced world, 24/7 accessibility is not just a buzzword; it is a business need. Enterprises want to equip themselves with a secure and efficient solution that is cost-effective and provides complete flexibility for a unique User Experience. Our Xperian range of products take on these challenges and provide innovative IT solutions to Enterprises, by elevating their digital journey with cutting-edge innovation. So that they can achieve their digital goals seamlessly.

MORE PRODUCTIVITY & ENHANCED UX

Enhance User Experience & Productivity

- Enhance User Experience with automated workflows and 24/7 self-service access on custom-branded products
- Experience quick and personalised resolution via video-enabled support and contactless service
- Enhance employee productivity and efficiency with immediate substitutes, and improved TAT
- Real-time tracking and support, with safe and secure storage

Operate & Scale with Agility & Flexibility

- Achieve definitive ROI with a flexible distribution method for small/remote offices, without staffing a dedicated IT Dept.
- Explore opportunities to scale, with minimum investment in time, expenses and resources
- Eliminate cumbersome ordering processes and maximise savings, with economies of scale
- Global logistics management across 180+ countries with outright purchase or leasing options (CapEx/OpEx Models)

Streamline Workflows & IT Spends

- Manage SKUs with centralised control and insightful analytics
- Maximise adaptability by customising solution to business goals and objectives
- Increase workplace efficiency with instant availability of SKUs and IT support
- Easy integration with leading ITSM tools like ServiceNow, etc. and merchandising (end-to-end delivery, deployment, fulfilment, maintenance & service)
